

NEURODEGENERATIVE DISEASE

GIND – 2026

We are delighted to invite you to *The Global Insights on Neurodegenerative Diseases (GIND-2026)*, a global virtual event hosted by *RMN MEDCON*, bringing together the brightest minds in neurology and neuroscience. This exclusive webinar will delve into the latest innovations, research breakthroughs, and clinical best practices that are shaping the future of healthcare for patients with neurodegenerative disorders.

Join leading neurologists, neuroscientists, healthcare professionals, and researchers from around the world for an interactive event featuring expert talks, panel discussions, and real-world case insights. Whether you are a practising physician, a neurology specialist, a medical student, or a healthcare innovator, this summit offers valuable learning and networking opportunities — all from the comfort of your screen

On behalf of the Organizing Committee, we are pleased to invite you to participate in The Global Insights on Neurodegenerative Diseases (GIND-2026) — a premier global virtual event dedicated to advancing research, clinical practice, education, and collaboration in the field of neurodegenerative disorders worldwide.

We look forward to your virtual presence at this inspiring global event.

Sincerely,
Joseph Leo
Webinar Chair

Conference sessions may be geared toward participants with different levels of Experience or different positions. Main conference sessions include the following tracks. Choose to follow one track or move between tracks to create your own personalized conference experience.

- Neurodegenerative Diseases Research and Therapy
- Parkinson's Disease: Current Treatments and Advances
- Alzheimer's Disease: Diagnosis and Therapies
- Huntington's Disease: Genetics and Emerging Therapies
- ALS (Amyotrophic Lateral Sclerosis): Progress and Challenges
- Multiple Sclerosis (MS): Diagnosis and Disease-Modifying Therapies
- Dementia diagnosis, treatment
- Current Pharmacological Therapies
- Gene Therapy & Genetic Approaches
- Stem Cell Therapy & Regenerative Medicine
- Immunotherapy in Neurodegeneration
- Early Diagnosis & Predictive Biomarkers
- Personalized Medicine in Neurodegenerative Diseases
- Advances in Neuroimaging Techniques
- The Role of Inflammation in Neurodegeneration
- Neuroprotective Strategies
- Advances in Clinical Trials
- AI in Neurodegenerative Research
- Genetic Counselling & Testing
- Diet & Nutrition in Neurodegeneration
- Gut Microbiota and Neurodegeneration
- Mental Health & Social Support for Caregivers
- Ethical & Legal Challenges in Research
- Palliative & End-of-Life Care
- Cross-Disciplinary Approaches
- Antioxidants & Metabolic Therapies
- Neurostimulation & Brain-Computer Interfaces
- Sleep & Circadian Rhythms in Neurodegeneration
- Mild Cognitive Impairment
- Amyloid, Tauopathies and TDP-43 Proteinopathies
- Prion Diseases
- Frontotemporal Dementia, Vascular Dementia & Lewy Body Dementia
